Improve

How You Manage, Process, and Use Documents

A document SDK (Software Development Kit), is a powerful document processing tool that enables government agencies and the public sector to provide digital services for diverse constituencies, end the need for paper-based data, and meet stringent regulatory standards.

The Main
Challenges
in the Public Sector

Manual document processing poses challenges due to errors, delays, and complex workflows, which can lead to a lack of efficiency. Government agencies deal with a vast amount of regulatory data and sensitive information like citizen records. Errors in these documents can lead to **tax collection issues, data breaches, delays in processing critical documents, and erosion of public trust**. As the public sector embarks on digital transformation, it's critical to use document processing technology that ensures accuracy, efficiency, and data security.

Where is this pain felt the most?

Tax Documents

Errors in these documents due to manual processing can lead to incorrect benefits and tax collection issues.

Permits and Licenses

Paper-based systems can cause significant delays in processing these essential documents.
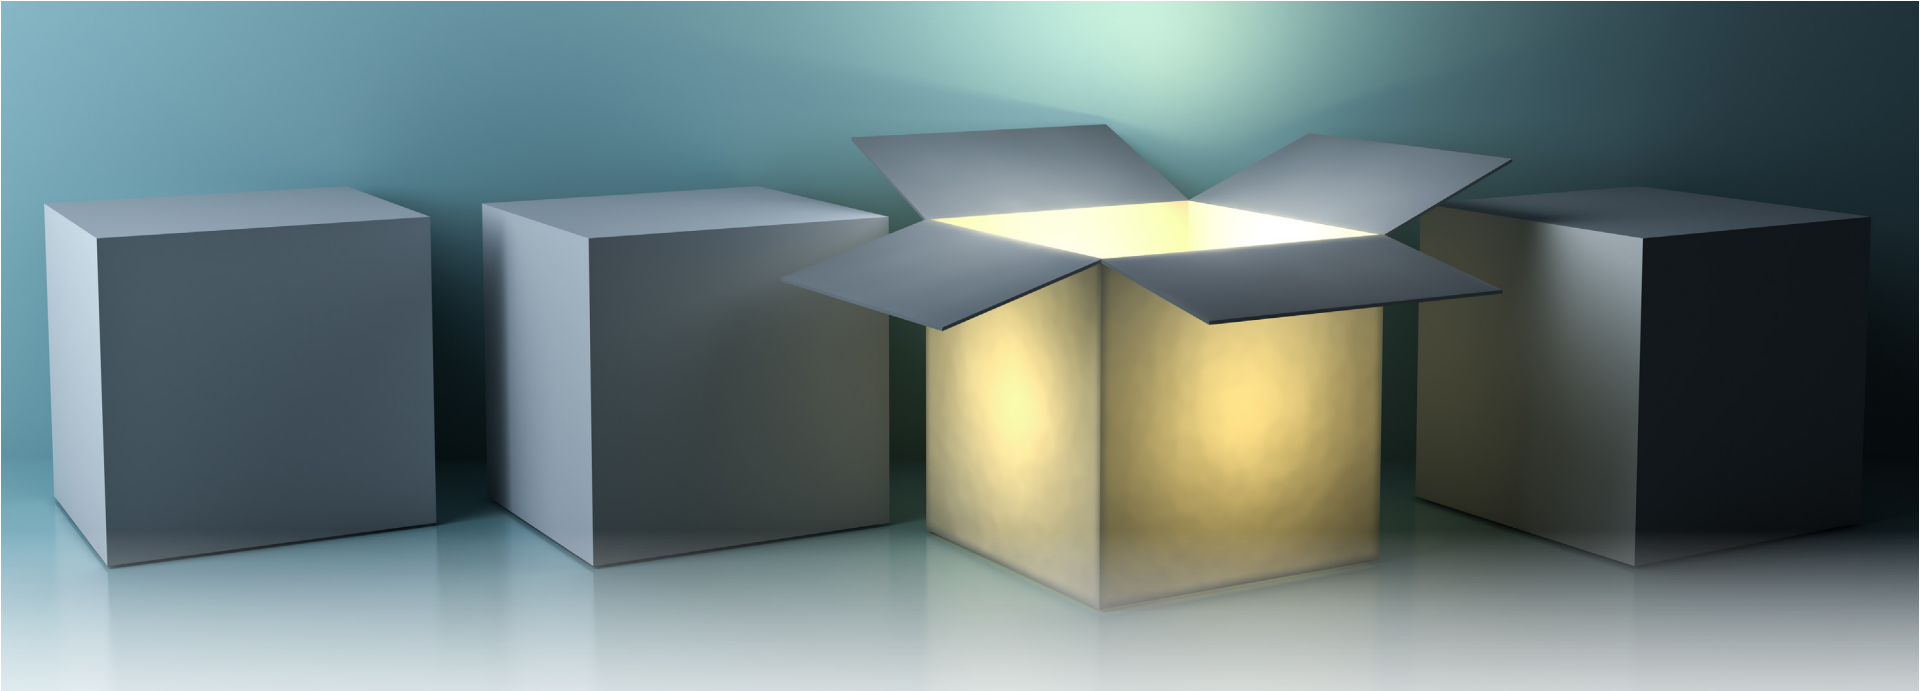

Service Delivery

Incompatible legacy systems can cause inefficient delivery of critical services.

Compliance

Some technology doesn't meet regulatory standards, which results in less efficient processes to be compliant.

How Can
SDKs
Help?

Apryse can help the public sector by providing solutions for:

Automation
Boost efficiency with automated document creation, conversion, and extraction.

Accuracy
Ensure all data is accurate and reduce manual errors with automated document processing.

Compliance
Meet current and future regulatory standards for document generation, use, and archiving.

Citizen Experience
Provide timely and efficient document-related services to diverse constituencies.

Collaboration
Securely view and share documents to ensure the right parties have the right information.

Why

Apryse
Over Anyone Else?

PROVEN BACKING

Supported by renowned investors Silver Smith Capital and Thoma Bravo, with a history serving billions of users, millions of developers, and thousands of global enterprises.

CORE SECURITY

Our SDK, fully embedded in your app code, ensures top-tier data security by eliminating external calls and transmission. This client-side processing maintains industry compliance and keeps user data safe.

RELIABLE EXPERTISE

Apryse SDK, developed in-house for 25 years, guarantees accurate document rendering, conversion, and processing for exceptional reliability.

EXCEPTIONAL SUPPORT

Our responsive **support** and documentation provide help and guidance, empowering you with advanced technology and industry-leading assistance.

PROPRIETARY CUSTOMIZATION

Our PDF SDK offers customization, reliability, and peace of mind, enabling you to prioritize innovation and growth over troubleshooting and maintenance.

"Much lower support and maintenance costs due to using Apryse as opposed to the alternatives are massive for us as a business. Apryse provided us a proven quickness of integration and richness of capabilities, which ensured the solution would scale efficiently."

SUDEEP VENKATESH
Egress Chief Product Officer

Egress is a UK-based security service provider. **Over eight million people**, including those at government agencies, use Egress's intelligent email solutions to prevent accidental and intentional data breaches, and access detailed reporting required for compliance purposes.

They partnered with Apryse to enrich their platform with new and scalable capabilities, including web-based PDF redaction and real-time collaboration.
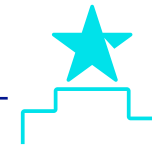

Customer
Case Study

⚠ The Challenges

- ⚠ Enhance platform with secure web-based PDF redaction and real-time collaboration
- ⚠ Minimize cost of servers and new feature maintenance
- ⚠ Ensure ability to quickly scale and grow platform
- ⚠ Continuous product differentiation with new key features
- ⚠ Accelerate time to market and free up resources for other projects
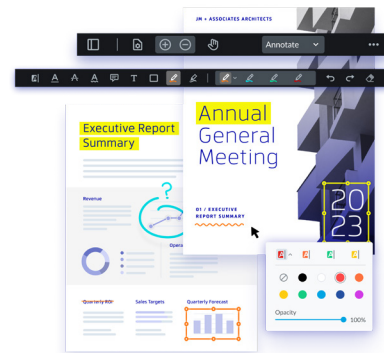

★ The Results

- ★ Delivery of web-based document features 4x faster with Apryse (vs in-house)
- ★ Eliminated server and maintenance costs with high-fidelity client-side rendering
- ★ Freed up specialized developer resources for new security and encryption capabilities
- ★ Gained a comprehensive, cross-platform SDK
- ★ Support for Egress's current and future roadmaps, enabling innovation in new document features and file formats

"Other products support redaction. But they require going to another website and re-uploading the PDF or leaving the browser to open a different app on the desktop. The advantage of using Apryse is the user doesn't have to leave our application, making the customer workflow and integration of the SDK much simpler." **~ Sudeep Venkatesh**

Key
Features

View & Annotate Client-Side

Securely open and annotate a wide range of government documents, ensuring timely feedback and efficient processing.

### Real-Time Review & Approval

Effectively collaborate in real-time to help speed up the processing of critical documents like tax-related forms.

Generate Documents from Data & Templates

Connect data sources to automatically create reports, permit applications, and more.

PDF Text Editing & Manipulation

Enable quick text edits in PDFs with audit trails and user permissions for secure and compliant document updates.

Digital Signature Workflows

Establish customized document signing workflows to expedite approval processes and ensure timely service delivery.
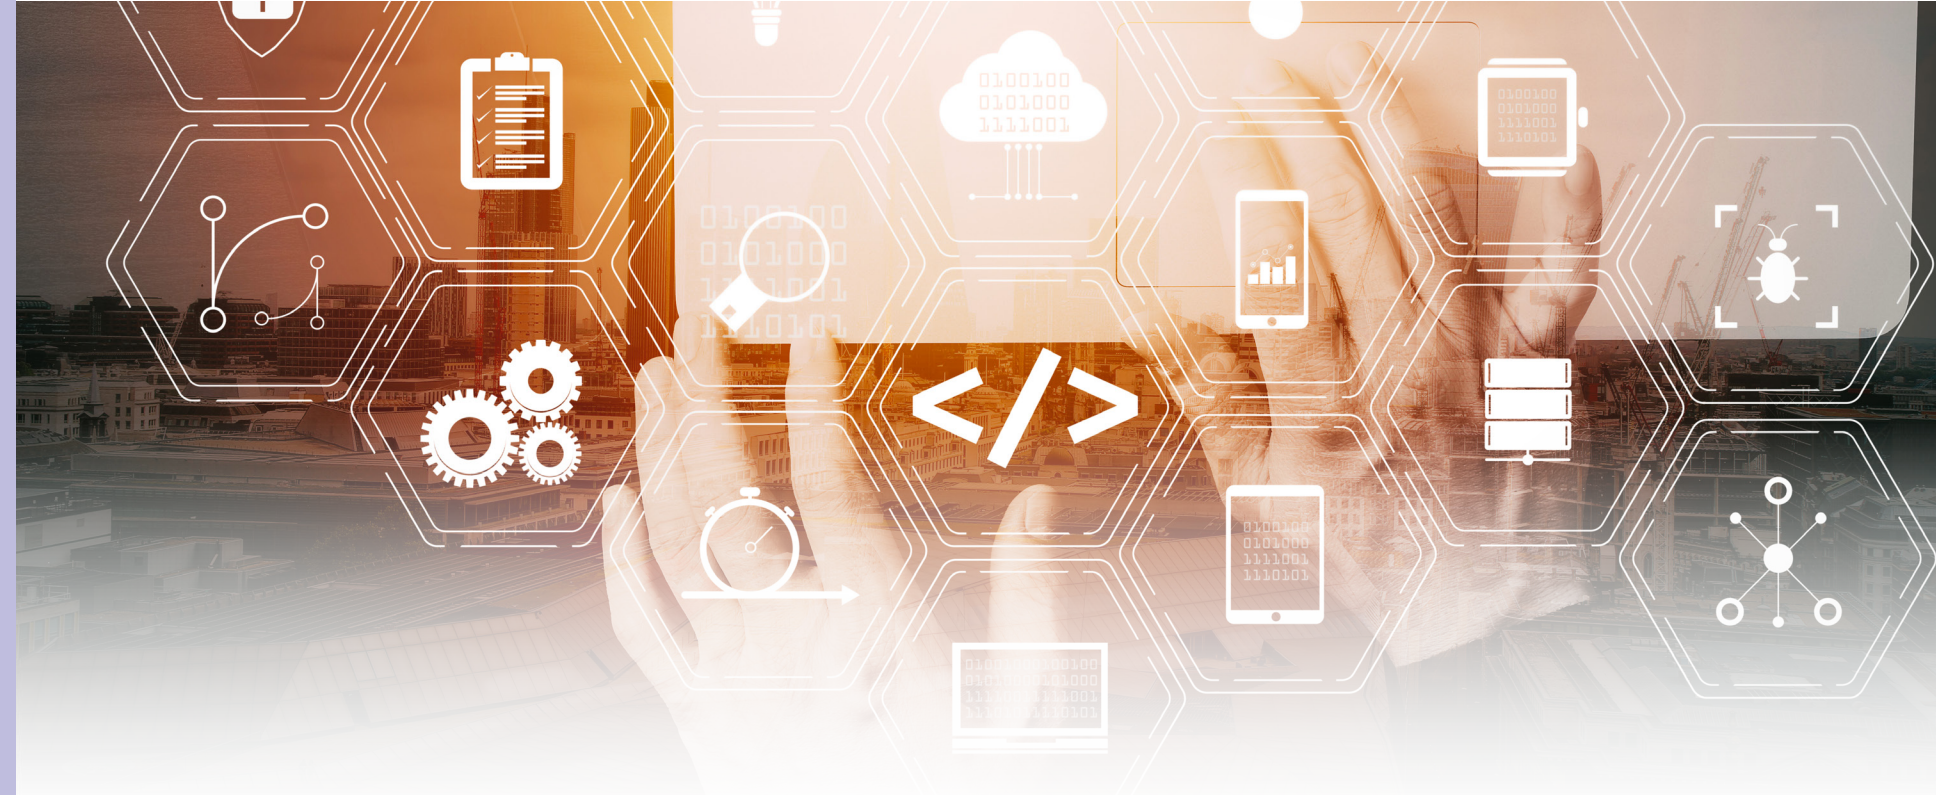

Intelligent Data Extraction Automation

Maintain information integrity. Extract and process data, text, and tables from scanned PDFs with AI-powered accuracy.
